- B-Tech with Computer Science Engineering from S.V.V.S.N Engineering College.

## TECHNICAL EXPERTISE

<b>Programming Languages</b>	:	Java, J2EE.
<b>Frame Works</b>	:	Spring MVC, spring boot.
<b>Cloud computing Technologies</b>	:	AWS.
<b>ORM tool</b>	:	Hibernate.
<b>Distributed Technologies</b>	:	Web Services (REST), Micro Services.
<b>Database</b>	:	Oracle, SQL.
<b>Web Technologies</b>	:	HTML, XML, JavaScript, Angular JS, CSS.
<b>Web Servers</b>	:	Apache-Tomcat.
<b>Application Servers</b>	:	Web logic.
<b>Version Control Tools</b>	:	GIT, GITHUB.
<b>Database Tools</b>	:	SQL Developer, SQL
<b>IDE's</b>	:	Eclipse, MY Eclipse, STS.
<b>Application Tools</b>	:	Virtual Box.
<b>Drawing Tools</b>	:	Visio
<b>Operating Systems</b>	:	Windows, Linux
<b>Domain Experience</b>	:	Banking, e-commerce.

## PROJECT EXPERIENCE

### PROJECT PROFILE 1

Project Title	<b>Payment Security (Paysec)</b>
Client	<b>Broadcom(CA Technologies)</b>
Technologies	<b>springboot, MicroServices, Oracle, REST, Angular, AWS</b>
Domain	<b>Banking</b>

**Description:** The Payment Security application will be basically implementing more security to the Bank Customers especially in e-commerce application while customers are purchasing the products. Nowadays Fraudsters are doing more fraud in ecommerce application by hacking or stealing the customer sensitive information like Credit card, Debit card, and Bank Account details. So The Payment Security application will protect the Bank customers from Fraudsters. So that customers will feel better security, experience and believes from the Payment Security.

### ROLES AND RESPONSIBILITIES

- Implementing Business Logic.
- Writing DB queries.
- Resolving Production issues.
- Involved in Design Issues.
- Participate Daily Standup calls.
- Sending the status report daily basis.
- Writing the JUNIT Test Cases.

### PROJECT PROFILE 2

Project Title	<b>Transactive Business Online Service(TBOS)</b>
Client	<b>ANZ(Australian Newzeland Bank)</b>

Technologies	Java, Micro Services, Spring boot, Spring cloud
Frameworks	Spring, Hibernate, webservices(SOAP, TEST), Angular JS

**Description:** The project involves the development Service Requests Which are made by the customers. The customer has capability to raise any type of request including Ordering New Cheque book, Close the loan, ordering the ATM cards and credit cards etc. So we have to take the request from the customer if it is required for any approvals we need to interact with the backend PEGA system and we can process the request and provide the appropriate solution for the end users.

### **ROLES AND RESPONSIBILITIES**

- Developing the database scripts and database queries.
- Writing the JUNIT Test Cases.
- Participate Daily Standup calls.
- Sending the status report daily basis.
- Involved in requirement analysis.
- Developing Business logic of the application.
- Developing the User Interface.
- Provide the form validations and developing the business logic.

### **Declaration:**

I hereby declare that the above-mentioned information is true to the best of my knowledge.
